

CVE-2025-26629 Microsoft Office Remote Code Execution Vulnerability

Severity: N/A

Description: To comprehensively address CVE-2025-26629, Microsoft has released May 2025 security updates for all affected versions of Microsoft Office. Customers running any of these versions should ensure that they have the latest build installed. For more information and to verify the build version, see <https://learn.microsoft.com/en-us/officeupdates/microsoft365-apps-security-updates>.

CVE-2025-26642 Microsoft Office Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office for Mac. Customers running affected Mac software should install the update for their product to be protected from this vulnerability. Customers running other Microsoft Office software do not need to take any action. See the [Release Notes](<https://go.microsoft.com/fwlink/p/?linkid=831049>) for more information and download links.

CVE-2025-27745 Microsoft Office Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office for Mac. Customers running affected Mac software should install the update for their product to be protected from this vulnerability. Customers running other Microsoft Office software do not need to take any action. See the [Release Notes](<https://go.microsoft.com/fwlink/p/?linkid=831049>) for more information and download links.

CVE-2025-27746 Microsoft Office Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office for Mac. Customers running affected Mac software should install the update for their product to be protected from this vulnerability. Customers running other Microsoft Office software do not need to take any action. See the [Release Notes](<https://go.microsoft.com/fwlink/p/?linkid=831049>) for more information and download links.

CVE-2025-27747 Microsoft Word Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office for Mac. Customers running affected Mac software should install the update for their product to be protected from this vulnerability. Customers running other Microsoft Office software do not need to take any action. See the [Release Notes](<https://go.microsoft.com/fwlink/p/?linkid=831049>) for more information and download links.

CVE-2025-27748 Microsoft Office Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office for Mac. Customers running affected Mac software should install the update for their product to be protected from this vulnerability. Customers running other Microsoft Office software do not need to take any action. See the [Release Notes](<https://go.microsoft.com/fwlink/p/?linkid=831049>) for more information and download links.

CVE-2025-27749 Microsoft Office Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office for Mac. Customers running affected Mac software should install the update for their product to be protected from this vulnerability. Customers running other Microsoft Office software do not need to take any action. See the [Release Notes](<https://go.microsoft.com/fwlink/p/?linkid=831049>) for more information and download links.

CVE-2025-27750 Microsoft Excel Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office for Mac. Customers running affected Mac software should install the update for their product to be protected from this vulnerability. Customers running other Microsoft Office software do not need to take any action. See the [Release Notes](<https://go.microsoft.com/fwlink/p/?linkid=831049>) for more information and download links.

CVE-2025-27751 Microsoft Excel Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office for Mac. Customers running affected Mac software should install the update for their product to be protected from this vulnerability. Customers running other Microsoft Office software do not need to take any action. See the [Release Notes](<https://go.microsoft.com/fwlink/p/?linkid=831049>) for more information and download links.

CVE-2025-27752 Microsoft Excel Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office for Mac. Customers running affected Mac software should install the update for their product to be protected from this vulnerability. Customers running other Microsoft Office software do not need to take any action. See the [Release Notes](<https://go.microsoft.com/fwlink/p/?linkid=831049>) for more information and download links.

CVE-2025-29791 Microsoft Excel Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office for Mac. Customers running affected Mac software should install the update for their product to be protected from this vulnerability. Customers running other Microsoft Office software do not need to take any action. See the [Release Notes](<https://go.microsoft.com/fwlink/p/?linkid=831049>) for more information and download links.

CVE-2025-29816 Microsoft Word Security Feature Bypass Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office for Mac. Customers running affected Mac software should install the update for their product to be protected from this vulnerability. Customers running other Microsoft Office software do not need to take any action. See the [Release Notes](<https://go.microsoft.com/fwlink/p/?linkid=831049>) for more information and download links.

CVE-2025-29820 Microsoft Word Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office for Mac. Customers running affected Mac software should install the update for their product to be protected from this vulnerability. Customers running other Microsoft Office software do not need to take any action. See the [Release Notes](<https://go.microsoft.com/fwlink/p/?linkid=831049>) for more information and download links.

CVE-2025-29822 Microsoft OneNote Security Feature Bypass Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office for Mac. Customers running affected Mac software should install the update for their product to be protected from this vulnerability. Customers running other Microsoft Office software do not need to take any action. See the [Release Notes](<https://go.microsoft.com/fwlink/p/?linkid=831049>) for more information and download links.

CVE-2025-29976 Microsoft SharePoint Server Elevation of Privilege Vulnerability

Severity: N/A

Description: Improper privilege management in Microsoft Office SharePoint allows an authorized attacker to elevate privileges locally.

CVE-2025-29977 Microsoft Excel Remote Code Execution Vulnerability

Severity: N/A

Description: Use after free in Microsoft Office Excel allows an unauthorized attacker to execute code locally.

CVE-2025-29978 Microsoft PowerPoint Remote Code Execution Vulnerability

Severity: N/A

Description: Use after free in Microsoft Office PowerPoint allows an unauthorized attacker to execute code locally.

CVE-2025-29979 Microsoft Excel Remote Code Execution Vulnerability

Severity: N/A

Description: Heap-based buffer overflow in Microsoft Office Excel allows an unauthorized attacker to execute code locally.

CVE-2025-30375 Microsoft Excel Remote Code Execution Vulnerability

Severity: N/A

Description: Access of resource using incompatible type ('type confusion') in Microsoft Office Excel allows an unauthorized attacker to execute code locally.

CVE-2025-30376 Microsoft Excel Remote Code Execution Vulnerability

Severity: N/A

Description: Heap-based buffer overflow in Microsoft Office Excel allows an unauthorized attacker to execute code locally.

CVE-2025-30377 Microsoft Office Remote Code Execution Vulnerability

Severity: N/A

Description: Use after free in Microsoft Office allows an unauthorized attacker to execute code locally.

CVE-2025-30378 Microsoft SharePoint Server Remote Code Execution Vulnerability

Severity: N/A

Description: Deserialization of untrusted data in Microsoft Office SharePoint allows an unauthorized attacker to execute code locally.

CVE-2025-30379 Microsoft Excel Remote Code Execution Vulnerability

Severity: N/A

Description: Release of invalid pointer or reference in Microsoft Office Excel allows an unauthorized attacker to execute code locally.

CVE-2025-30381 Microsoft Excel Remote Code Execution Vulnerability

Severity: N/A

Description: Out-of-bounds read in Microsoft Office Excel allows an unauthorized attacker to execute code locally.

CVE-2025-30382 Microsoft SharePoint Server Remote Code Execution Vulnerability

Severity: N/A

Description: Deserialization of untrusted data in Microsoft Office SharePoint allows an unauthorized attacker to execute code locally.

CVE-2025-30383 Microsoft Excel Remote Code Execution Vulnerability

Severity: N/A

Description: Access of resource using incompatible type ('type confusion') in Microsoft Office Excel allows an unauthorized attacker to execute code locally.

CVE-2025-30384 Microsoft SharePoint Server Remote Code Execution Vulnerability

Severity: N/A

Description: Deserialization of untrusted data in Microsoft Office SharePoint allows an unauthorized attacker to execute code locally.

CVE-2025-30386 Microsoft Office Remote Code Execution Vulnerability

Severity: N/A

Description: Use after free in Microsoft Office allows an unauthorized attacker to execute code locally.

CVE-2025-30393 Microsoft Excel Remote Code Execution Vulnerability

Severity: N/A

Description: Use after free in Microsoft Office Excel allows an unauthorized attacker to execute code locally.

CVE-2025-32704 Microsoft Excel Remote Code Execution Vulnerability

Severity: N/A

Description: Buffer over-read in Microsoft Office Excel allows an unauthorized attacker to execute code locally.

CVE-2025-32705 Microsoft Outlook Remote Code Execution Vulnerability

Severity: N/A

Description: Out-of-bounds read in Microsoft Office Outlook allows an unauthorized attacker to execute code locally.

CVE-2025-32717 Microsoft Word Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office 365. Customers running Office 365 should log in ensure you have the latest update to be protected from this vulnerability. See the [Release Notes](<https://learn.microsoft.com/en-us/officeupdates/microsoft365-apps-security-updates>) for more information.

CVE-2025-47162 Microsoft Office Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office 365. Customers running Office 365 should log in ensure you have the latest update to be protected from this vulnerability. See the [Release Notes](<https://learn.microsoft.com/en-us/officeupdates/microsoft365-apps-security-updates>) for more information.

CVE-2025-47163 Microsoft SharePoint Server Remote Code Execution Vulnerability

Severity: N/A

Description: Deserialization of untrusted data in Microsoft Office SharePoint allows an authorized attacker to execute code over a network.

CVE-2025-47164 Microsoft Office Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office 365. Customers running Office 365 should log in ensure you have the latest update to be protected from this vulnerability. See the

[Release Notes](https://learn.microsoft.com/en-us/officeupdates/microsoft365-apps-security-updates) for more information.

CVE-2025-47165 Microsoft Excel Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office 365. Customers running Office 365 should log in ensure you have the latest update to be protected from this vulnerability. See the [Release Notes](https://learn.microsoft.com/en-us/officeupdates/microsoft365-apps-security-updates) for more information.

CVE-2025-47166 Microsoft SharePoint Server Remote Code Execution Vulnerability

Severity: N/A

Description: Deserialization of untrusted data in Microsoft Office SharePoint allows an authorized attacker to execute code over a network.

CVE-2025-47167 Microsoft Office Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office 365. Customers running Office 365 should log in ensure you have the latest update to be protected from this vulnerability. See the [Release Notes](https://learn.microsoft.com/en-us/officeupdates/microsoft365-apps-security-updates) for more information.

CVE-2025-47168 Microsoft Word Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office 365. Customers running Office 365 should log in ensure you have the latest update to be protected from this vulnerability. See the [Release Notes](https://learn.microsoft.com/en-us/officeupdates/microsoft365-apps-security-updates) for more information.

CVE-2025-47169 Microsoft Word Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office 365. Customers running Office 365 should log in ensure you have the latest update to be protected from this vulnerability. See the [Release Notes](https://learn.microsoft.com/en-us/officeupdates/microsoft365-apps-security-updates) for more information.

CVE-2025-47170 Microsoft Word Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office 365. Customers running Office 365 should log in ensure you have the latest update to be protected from this vulnerability. See the [Release Notes](<https://learn.microsoft.com/en-us/officeupdates/microsoft365-apps-security-updates>) for more information.

CVE-2025-47171 Microsoft Outlook Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office 365. Customers running Office 365 should log in ensure you have the latest update to be protected from this vulnerability. See the [Release Notes](<https://learn.microsoft.com/en-us/officeupdates/microsoft365-apps-security-updates>) for more information.

CVE-2025-47172 Microsoft SharePoint Server Remote Code Execution Vulnerability

Severity: N/A

Description: Improper neutralization of special elements used in an sql command ('sql injection') in Microsoft Office SharePoint allows an authorized attacker to execute code over a network.

CVE-2025-47173 Microsoft Office Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office 365. Customers running Office 365 should log in ensure you have the latest update to be protected from this vulnerability. See the [Release Notes](<https://learn.microsoft.com/en-us/officeupdates/microsoft365-apps-security-updates>) for more information.

CVE-2025-47174 Microsoft Excel Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office 365. Customers running Office 365 should log in ensure you have the latest update to be protected from this vulnerability. See the [Release Notes](<https://learn.microsoft.com/en-us/officeupdates/microsoft365-apps-security-updates>) for more information.

CVE-2025-47175 Microsoft PowerPoint Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office 365. Customers running Office 365 should log in ensure you have the latest update to be protected from this vulnerability. See the [Release Notes](<https://learn.microsoft.com/en-us/officeupdates/microsoft365-apps-security-updates>) for more information.

CVE-2025-47176 Microsoft Outlook Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office 365. Customers running Office 365 should log in ensure you have the latest update to be protected from this vulnerability. See the [Release Notes](<https://learn.microsoft.com/en-us/officeupdates/microsoft365-apps-security-updates>) for more information.

CVE-2025-47953 Microsoft Office Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office 365. Customers running Office 365 should log in ensure you have the latest update to be protected from this vulnerability. See the [Release Notes](<https://learn.microsoft.com/en-us/officeupdates/microsoft365-apps-security-updates>) for more information.

CVE-2025-47957 Microsoft Word Remote Code Execution Vulnerability

Severity: N/A

Description: Microsoft is announcing the availability of the security updates for Microsoft Office 365. Customers running Office 365 should log in ensure you have the latest update to be protected from this vulnerability. See the [Release Notes](<https://learn.microsoft.com/en-us/officeupdates/microsoft365-apps-security-updates>) for more information.

CVE-2025-47994 Microsoft Office Elevation of Privilege Vulnerability

Severity: N/A

Description: Deserialization of untrusted data in Microsoft Office allows an unauthorized attacker to elevate privileges locally.

CVE-2025-48812 Microsoft Excel Information Disclosure Vulnerability

Severity: N/A

Description: Out-of-bounds read in Microsoft Office Excel allows an unauthorized attacker to disclose information locally.

CVE-2025-49695 Microsoft Office Remote Code Execution Vulnerability

Severity: N/A

Description: Use after free in Microsoft Office allows an unauthorized attacker to execute code locally.

CVE-2025-49696 Microsoft Office Remote Code Execution Vulnerability

Severity: N/A

Description: Out-of-bounds read in Microsoft Office allows an unauthorized attacker to execute code locally.

CVE-2025-49697 Microsoft Office Remote Code Execution Vulnerability

Severity: N/A

Description: Heap-based buffer overflow in Microsoft Office allows an unauthorized attacker to execute code locally.

CVE-2025-49698 Microsoft Word Remote Code Execution Vulnerability

Severity: N/A

Description: Use after free in Microsoft Office Word allows an unauthorized attacker to execute code locally.

CVE-2025-49699 Microsoft Office Remote Code Execution Vulnerability

Severity: N/A

Description: Use after free in Microsoft Office allows an unauthorized attacker to execute code locally.

CVE-2025-49700 Microsoft Word Remote Code Execution Vulnerability

Severity: N/A

Description: Use after free in Microsoft Office Word allows an unauthorized attacker to execute code locally.

CVE-2025-49701 Microsoft SharePoint Remote Code Execution Vulnerability

Severity: N/A

Description: Improper authorization in Microsoft Office SharePoint allows an authorized attacker to execute code over a network.

CVE-2025-49702 Microsoft Office Remote Code Execution Vulnerability

Severity: N/A

Description: Access of resource using incompatible type ('type confusion') in Microsoft Office allows an unauthorized attacker to execute code locally.

CVE-2025-49703 Microsoft Word Remote Code Execution Vulnerability

Severity: N/A

Description: Use after free in Microsoft Office Word allows an unauthorized attacker to execute code locally.

CVE-2025-49704 Microsoft SharePoint Remote Code Execution Vulnerability

Severity: N/A

Description: Improper control of generation of code ('code injection') in Microsoft Office SharePoint allows an authorized attacker to execute code over a network.

CVE-2025-49705 Microsoft PowerPoint Remote Code Execution Vulnerability

Severity: N/A

Description: Heap-based buffer overflow in Microsoft Office PowerPoint allows an unauthorized attacker to execute code locally.

CVE-2025-49706 Microsoft SharePoint Server Spoofing Vulnerability

Severity: N/A

Description: Improper authentication in Microsoft Office SharePoint allows an authorized attacker to perform spoofing over a network.

CVE-2025-49711 Microsoft Excel Remote Code Execution Vulnerability

Severity: N/A

Description: Use after free in Microsoft Office Excel allows an unauthorized attacker to execute code locally.

CVE-2025-53771 Microsoft SharePoint Server Spoofing Vulnerability

Severity: N/A

Description: Improper limitation of a pathname to a restricted directory ('path traversal') in Microsoft Office SharePoint allows an authorized attacker to perform spoofing over a network.
